### Verbal Description

Fragment of a hollow, mold-made, multi-chambered ocarina with 2  $\frac{1}{2}$  S.S.C. + 2 stops. The chambers are joined by a very rough line of clay, the stops are opposite one another at full along the join line. The exterior includes a small, sharp-tapered conical projection, possibly part of a vestigial arm. There is one partially destroyed chamber, no paint or slip, no fig core.
